

Preventing
antimicrobial
resistance together
21th Nov.

World AMR Awareness Week is marked from 18 - 24 Nov.

The workshop is part of the World AMR Awareness Week, a global initiative aimed at enhancing awareness and comprehension of antimicrobial resistance (AMR). This campaign serves as a worldwide effort to bring attention to the growing issue of AMR. The specific goal of the workshop is to increase awareness regarding the significance of using antibiotics and antifungals appropriately, while also highlighting the imminent threat posed by antimicrobial resistance. Through this workshop, participants will gain insights into the proper use of these medications and the broader implications of AMR, contributing to a collective effort to address and mitigate this global health challenge.

WORKSHOP PROGRAM AND SPEAKER INFORMATION

10:00 TO 10:30 AM
DR. CHRO YASSIN

Beta lactam antibiotic history, mechanism of action, spectrum of activity and clinical indication

10:30 TO 11:00 AM
DR. SHLER GHAFOUR

Mechanisms of Antibiotic Resistance

11:00 TO 11:30 AM
DR. SAMIRA FATTAH

ESBL Detection: Phenotypic Methods

11:30 TO 12:00 PM
MR. HALO SIRAJADIN

Current state of antimicrobial resistance in our region

Location
Medical Research Center
Hawler Medical University
100m road
Opposite college of Pharmacy

Tuesday
